

LEARN HOW TO MAKE A WEBSITE

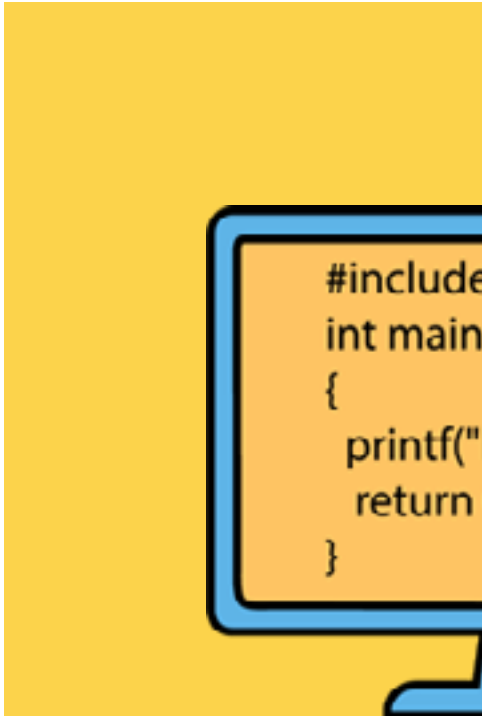

DIY GUIDE

by **Tech** Pumpkin Inc.

Tutorial

Learn how to
make a
website

```
#include <stdio.h>
int main()
{
    printf("Hello, World!");
    return 0;
}
```

DIY GU

Get Started

THINGS YOU NEED TO GET STARTED

1. Domain Name e.g. www.xyz.com
2. Hosting e.g. a server to host godaddy? have you heard of it?
3. Lot of time and patience ???

Good place
to buy a
domain

Unlimited, just keep
your eyes open.

HERE ARE A FEW POPULAR NAMES

search 'buy domain' on google

JID

static website

wix or wordpress

shopify or woocommerce

dynamic website

Types of website

1 2 3 →

Blog Website

If you are looking for a website only publish your work or blogs. There a plenty of options in the market where you can do it for free.

Business Website

A normal looking website which provides information about your business like abouts, services and contact page etc...

eCommerce Website

The most complex one. On a website like this one you can sell stuff, accept payments and even manage orders.

//

Any platform or technology, the design of the website matters the most. A website should be attractive and at the same time work well on all resolutions and devices.

HOW TO CREATE A WEBSITE USING WIX

One of the more popular options of many available online.

You can find many online resources on who to make a wix website. Here is one which we liked the most.

https://youtu.be/aa6JS_8QtNI

Approx. \$30/month <you do all the work>

Hosting is included but domain name will cost ~\$20/year.

HOW TO MAKE A SQUARESPACE WEBSITE = FROM SCRATCH! =

Another popular options.

Squarespace is a good option for blogs,
website, shopping website etc

<https://youtu.be/u-DnVBrzeLs>

Between \$12/month to \$40/month <you do all the work>

Hosting is included but domain name
will cost ~\$20/year.

Wordpress is another option which offers a way more than any other platform.

But its a complex platform and requires some technical knowledge to setup.

<https://youtu.be/8AZ8GqW5iak>

Wordpress cost \$0, its free

But you require hosting to host website which may cost between \$5-10/month and a domain name which will cost ~\$20/year.

shopify or woocommerce
dynamic website

5 EASY STEPS

1. Buy/Register a domain name of your choice. You can buy it seperately or as a bundle on wix or squarespace.
2. Buy a hosting server to host your website. Some platforms like wix, squarespace may include hsoting in package, so no need to buy seperately
3. Choose a platform of your choice. Godaddy builder maybe the easiest option, followed by wix, squarespace and Wordpress.
4. Build your website using the online tools and your imagination. Create pages and add content.
5. Publish your website and submit to major search engine.

Easiest Option
